Re: Meltdown Glass- Cleaning and maintenance instructions

Our clear textured kiln-cast glass product will not require much care.

Vertically mounted glass does not easily attract dust and because the glass is textured any fingerprints or dirt that does get on the glass will not be easily noticed. We typically do not advise that our glass be placed on a routine cleaning schedule unless it is installed outdoors.

When cleaning is required, we recommend a lint-free cloth and nonammoniated glass cleaner. A feather duster works great for light cleaning. We do not recommend that any toxic or acidic cleaners such as acetone be used on the glass and we would also advise against any abrasive cleaner such as steel wool which could scratch the glass. Examples of nonammoniated glass cleaners are Sprayway, or the 3M Ammonia free cleaners. We do not recommend glass cleaners that have ammonia (such as Windex) because they are harmful to the environment.

Please let me know if you have any questions about these cleaning instructions.

Sincerely,

Meltdown Glass Art & Design
